

The **16th European Conference on Earthquake Engineering**, (16ECEE) will take place in Thessaloniki, Greece from 18 to 21 June 2018, organized by the Hellenic Society of Earthquake Engineering (member of EAEE), and the Civil Engineering Department of the Aristotle University of Thessaloniki.

16ECEE is around a breadth of state-of-the-art scientific topics: earthquake structural and geotechnical engineers, geologists and seismologists from all over the world will find an excellent forum to exchange ideas, share knowledge and discuss the most recent advances in soil dynamics, structural and geotechnical earthquake engineering, up to the boundaries of geology and engineering seismology.

Distinguished invited keynote lecturers will present recent and ongoing developments, addressing unresolved issues and projecting ideas for the future. **Special sessions, workshops and round table discussions** will also be carefully organized on selected topics of particular engineering and societal interest, to broaden the horizons of the earthquake engineering community and to reinforce international cooperation links.

The **ECEE conference** is a highly-anticipated event, held every four years, and is considered to be the leading activity of the European Association for Earthquake Engineering (EAEE), as well as the baseline and meeting point for the scientific and professional sector at an international level, with more than **1000 delegates from Europe and worldwide**.
